2 RECOMENDED POSITIONS

2.1

Please note that it is not recommended to mount your Hi-Lift Jack on the front or rear of your Rack only on the sides.

For ease of instruction, we have chosen to describe one orientation of mounting the Jack Bracket. The principals are the same, just the positioning and orientation of the brackets may vary depending on where you want to mount the jack.

Decide where on your Rack you would like to mount the Hi-Lift Jack. The brackets can be orientated upwards, downwards, front to back and back to front. Refer to Page 4, showing the various mounting options.

2.2

**IMPORTANT WARNING!** 

THIS POSITION IS NOT SUITED FOR A HI LIFT JACK.

3

FIT AND SECURE

3.1

Fit and Secure Base Bracket in desired position as shown.

3.2

Secure as shown. Insert 2 M8 Hex Nuts at the point indicated by the arrow.

3.3

Assemble the machined pin and securing bolt in hole pattern suited to your jack.

3.4

Fit and Secure the handle clamp in the desired position, using fasteners shown in Figure 1.2
