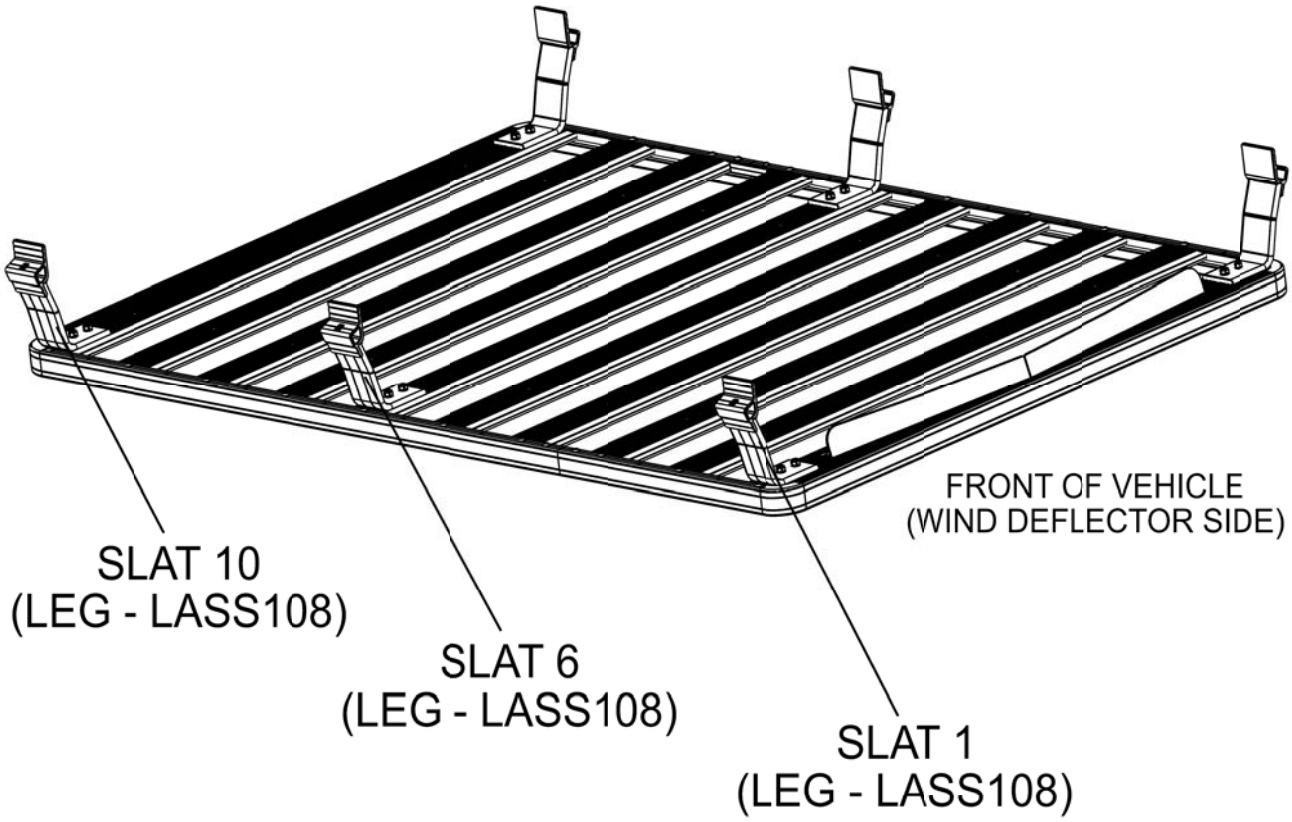
1 ASSEMBLE YOUR SLIMLINE II RACK

REFER TO SLIMLINE II TRAY UNIVERSAL ASSEMBLY INSTRUCTION (DOCUMENT RRSTUNI)

2 FIT THE LEGS

REFER TO LEG ASSEMBLY INSTRUCTION (DOCUMENT LASS1UNI)

(A) **With your Rack in the upside down position (Product sticker should be upside down), fit the Legs to your Slimline II Tray as illustrated below.**



NOTE: **DO NOT SLIDE THE RACK AND LEGS ACROSS THE ROOF! If there is a chance that you are going to set the roof rack on to the roof, place some moving blankets and/or towels over the roof. If you must lower the rack before it is in position, carefully set the Feet on the padded surface.**

Once your Slimline II Roof Rack is fitted, ensure a 15mm clearance is maintained between the Wind Deflector and the vehicles roof otherwise damage to the roof may occur. Bend the Wind Deflector by hand if necessary.

3 MOUNT THE RACK TO YOUR VEHICLE

REFER TO LEG ASSEMBLY INSTRUCTION (DOCUMENT LASS1UNI)

(A) Grab your friend and with one of you on each side of the Rack, flip the rack end over end (Prevents the Hex Bolts from falling out the machines slots) so that the Legs are facing down. With the Wind Deflectors facing forward, approach the vehicle from the rear lifting the Rack up and over the roof.

Position the Rack as far back as possible without it overhanging the rear of the vehicle. Bring the rack down slowly making sure that the Legs go directly into the gutters of the vehicle.

Center the Rack left to right. Ensure that the Rack is level - front to back and left to right - before fastening.

Congratulations, you have completed your installation. Take a step back and admire your work. Good Job!

4 TAKE A TRIP

(A) After your first adventure, check that all nuts, bolts, screws and fittings are tight. Re-tighten where needed. You'll find a small amount of settling has happened.

Go on many more adventures, periodically checking all nuts, bolts, screws and fittings.

Front Runner can not recommend a maximum load carrying capacity. Please refer to your vehicle manufacturer's recommendations.
